Think three times in Architectural Design

***a boutique hotel in harmony with nature**

The design motif is the harmony of nature, human, leisure, and dignity. Nature was incorporated into the materials and appearance, and the harmony of the four seasons was expressed so that it always feels beautiful. Also, the image of the best hotel was captured to create a relaxed and elegant atmosphere.

***antique entique interior**

It is a room with colorful gold-colored antique furniture and a luxurious marble floor that offers elegant comfort.

***between the sky and the sea, and where modern and traditional things coexist**

With both a city view and a sea view, you can enjoy a fantastic night view with its urban and sophisticated architecture and fantastic LED lighting, and give you a comfortable rest as if it were a vacation spot on the west coast.

Also, the traditional Korean traditional beauty can be felt through Hanok Village in front of the main gate, so it is a hotel that has the advantage of successful business with the pride of Koreans and the impressions of foreign buyers through Korean traditional beauty.
